

## **UI/UX Design using Figma/ - TEAM project (THREE MEMBERS)**

A local company / store wants you to build a design ( mobile or web) for listing their product using Figma some of the potential design include areas such as E commerce, education ,healthcare , engineering , Agriculture, automobiles , human resource, social media among others.

You are required to

1. Build an Auth Page (Login Page : Name, Password, Confirm Password).
2. After sign in, the app shows a page where
  - Switching Themes( Dark and Light Mode etc )
  - Build Bottom Navigation Menu.
  - Multiple Cards listing Image, Name ( On Hovering Price should be visible)
  - Footer with Social Media Icons
  - Payment Page ( Credit card Account No, Paypal, Mpesa. , Face Id Scan )

### **Team Project Information**

- Company description (each team project should be unique)
- 1-sentence/phrase value proposition
- Short, compelling project description (2-3 paragraph)
- Team member names (first name and last initial) and their roles

### **Professional and Aesthetic Design**

- Logo and clear product branding
- Strong usability
- Aesthetically appealing
- Error-free, concise writing (spelling, grammar, and language)
- Relative links are used

**NB. Marks will be awarded based on creativity, poor design will attract very low marks**

Project due on 7<sup>th</sup> November
